

# JESS GRAVES

## SENIOR STATISTICIAN

### CONTACT

-  713-416-3206
-  [jessica.lynn.graves@gmail.com](mailto:jessica.lynn.graves@gmail.com)
-  [jesslgraves.github.io](https://jesslgraves.github.io)
-  Houston, TX

### SKILLS

Statistical programming (R, Python, SAS)

Study design and power analysis

Longitudinal data analysis

Regulatory & academic report writing

### EDUCATION

**MS, Biostatistics**  
**MS, Epidemiology**

#### University of Pittsburgh

2016-2020  
Graduate School of Public Health

**BS, Anthropology**

#### University of Texas, Austin

2007-2010  
Phi Beta Kappa honor society member

### SOFTWARE

 [RAR: R Package for Rest Activity Rhythm analysis](#)

### ABOUT ME

Senior statistician with expertise in advanced statistical analysis, study design and report writing, driven to be a statistical leader on clinical research programs that contribute to the research and development of new treatments.

### WORK EXPERIENCE

#### Senior Statistician

Cellular Longevity, Inc. DBA Loyal 2021-Present

- Provide statistical leadership and support for clinical and preclinical trials, including power analysis, protocol development, advanced data analysis and regulatory and academic writing.
- Write the analysis plan for and power the first-ever longevity clinical trial.
- Statistical representation in cross-functional teams.
- Identify and build strategic research collaborations.
- Analyze and wrangle big datasets to predict aging-related diseases.
- Roles: Data Scientist to Snr. Data Scientist in 2022 to Snr. Statistician in 2024.

#### Statistician

University of Pittsburgh Medical Center 2020-2021

- Analyzed and published on how features of sleep and substance use effect health in cross-sectional and longitudinal cohorts.
- Developed algorithms to extract physiological features of sleep.
- Statistical consulting for UPMC Internal Medicine residents.

#### Graduate Student & Researcher in Biostatistics and Epidemiology

Graduate School of Public Health, University of Pittsburgh 2017-2020

- Developed and published on analytic methods used to estimate circadian rhythms and their relationship to health outcomes.
- Co-developed standard operating procedures for Study of Muscle, Mobility and Aging (SOMMA), an NIH-funded longitudinal study of aging.

#### Staff Biostatistician

Center for Occupational Biostatistics and Epidemiology 2017-2018

- Modeled and published findings on occupational hazards and their association with mortality and disease risk.
- Reported to clients, community stakeholders, and publication.
